WE SUPPORT THE SUSTAINABLE DEVELOPMENT GOALS

Bioinvent has received its own declaration SIS/TS 2:2025 to SS-EN ISO 26000:2021, re-verified according to SIS/TS 3:2025 , on February 2nd 2026, which shows the organization's social responsibility to maximize the contribution to sustainable development.

The credibility of the self-declaration and conformity with real conditions has been verified by VERIFY Agency of Sweden AB with accreditation number 10482 and is accredited by Swedac for verification for ISO/IEC 17029:2019.

The sustainability declaration consists of the management's statement and the organization's answers to the questions in SIS/TS 2:2025 , which is based on SS-EN ISO 26000:2021 Organizations' social responsibility - Guidance.

Delimitation has been entire BioInvent organization, as a legal entity, and all persons who work for or are under BioInvent's control. This includes the full range of BioInvent’s internal operations and the people directly employed by BioInvent or operating under its direction.

Assessment and Statement

VERIFY Agency of Sweden AB has verified all levels of activities that the organization states in the sustainability declaration. VERIFY Agency of Sweden AB has performed the verification through interviews with the organization's staff and through a sampling of the documentation that the organization refers to in the self-declaration and in the management of its sustainability work, such as policies, business routines, meeting planning, analyses, assessments, minutes, surveys, communication efforts, and training. An on-site audit was also performed.

Bioinvent has carefully answered the questions in the self-declaration and provided documents that support these answers. Bioinvent has described its value chain, performed a stakeholder analysis and a materiality analysis based on the ISO 26000 standard, and based on selected goals and sub-goals from the Sustainable Development Goals (SDGs). The goals have been compiled in an 'action plan of priority goals'. Linked to this is a business plan that includes an external SWOT analysis. BioInvent's sustainability methodology is anchored in a double materiality approach and VSME reporting (Basic and Comprehensive modules)

Throughout the year, Bioinvent intensified its commitment to the Agenda 2030, emphasizing the ongoing sustainability journey. This includes employee well-being initiatives, staff education on sustainability, and setting specific goals to reduce its environmental impact in 2026. Their main priorities are enabling manufacturing control and reduced external supply risk, practical circular economy practices such as reuse/refurbishment of equipment, waste sorting and use of specialist waste handlers for hazardous waste. The organization has also begun a Sope 3 analysis as part of 2025/2026 planning. There is clear management and division of responsibilities in the business. A high degree of transparency prevails and good business ethical behavior can be discerned throughout the business. Bioinvent shows respect and sensitivity to the interests of stakeholders.

Terms and Conditions

This statement must be renewed within twelve months from the date below. The statement may be revoked before the period of validity if facts have been added that show that the organization's social responsibility has decreased.

When the self-declaration is communicated publicly, this must be done together with the verification body's statement.

Decisions in this matter have been made by Decisionmaker, Emma Järund after a presentation by Lead Auditor, Boris Matijas.
