WE SUPPORT THE SUSTAINABLE DEVELOPMENT GOALS

Sprinta has received its own declaration SIS/TS 2:2025 to SS-EN ISO 26000:2021, re-verified according to SIS/TS 3:2025 , on 8th of June 2026, which shows the organization's social responsibility to maximize the contribution to sustainable development.

The credibility of the self-declaration and conformity with real conditions has been verified by VERIFY Agency of Sweden AB with accreditation number 10482 and is accredited by Swedac for verification for ISO/IEC 17029:2019.

The self-declaration consists of the management's statement and the organization's answers to the questions in SIS/TS 2:2025 , which is based on SS-EN ISO 26000:2021 Organizations' social responsibility - Guidance.
A defined limitation applies in cases where employees are deployed as external consultants within client organizations. In such situations, Sprinta does not retain full control over the working conditions, policies, or practices at the client site.

Assessment and Statement

VERIFY Agency of Sweden AB has verified all levels of activities that the organization states in the sustainability declaration. VERIFY Agency of Sweden AB has performed the verification through interviews with the organization's staff and through a sampling of the documentation that the organization refers to in the self-declaration and in the management of its sustainability work, such as policies, business routines, meeting planning, analyses, assessments, minutes, surveys, communication efforts, and training. An on-site audit was also performed.

Sprinta Consulting AB, is a consultancy company within IT services and digital solutions, and operating as part of the JAMBIZ group, a Sweden-based consulting company with offiices in Kungsbacka and Malmö. The company has four employees, though contributions from partner companies within the JAMBIZ group are also part of its operations.
The company develops and delivers digital solutions including its primary product CertumHUB, a SaaS platform that enables organisations to work with ISO 26000 alignment, sustainability documentation, and compliance readiness, as well as Govensa, a public-sector contract accountability tool launching in 2026, and a standalone e-learning platform. Sprinta is certified according to ISO 9001.

Sprinta has carefully answered the questions in the self-declaration and provided documents that support these answers. Sprinta conducted structured stakeholder mapping workshops in 2025, involving employees, leadership, and an external sustainability consultant, complemented by ongoing dialogue including an employee session at the fall 2024 company conference. Throughout the year, Sprinta intensified its commitment to the Agenda 2030, emphasizing the ongoing sustainability journey. This includes employee well-being initiatives, staff education on sustainability, and setting specific goals to reduce its environmental impact in 2026. Their main priorities are: reducing the carbon footprint throughout the Life Cycle Assessment (LCA), specifically focusing on raw materials; decreasing water consumption per produced ton product; reducing energy usage per produced ton product. There is clear management and division of responsibilities in the business. A high degree of transparency prevails and good business ethical behavior can be discerned throughout the business. Sprinta shows respect and sensitivity to the interests of stakeholders.

Sprinta's most significant sustainability contribution lies not in its own operational footprint, which is modest given its size, but in the tools it builds for others. CertumHUB enables SMEs to become audit-ready for sustainability standards, and Govensa supports accountable follow-up on public-sector supplier obligations covering quality, safety, working conditions, and environmental requirements. These products directly advance the selected SDGs and represent a coherent and commercially integrated approach to sustainable competitiveness.

Terms and Conditions

This statement must be renewed within twelve months from the date below. The statement may be revoked before the period of validity if facts have been added that show that the organization's social responsibility has decreased.

When the Sustainability Declaration is communicated publicly, this must be done together with the verification body's statement.

Decisions in this matter have been made by Decision Maker, Eva Vati after a presentation by Lead Auditor, Boris Matijas.
